Committee

Friends support the activities of the RTBG

Our fundraising has helped in the development of the Mixed Border, one of our most beautiful and noticeable projects. The Fuchsia House was rebuilt with our help. We have contributed to the maintenance of the Subantarctic House.

The electric buggy was purchased by Friends to help visitors move around the RTBG.

We have paid for the furnishings of the Orchid Lab, equipment for the Seed Bank and another vehicle for staff to use within the RTBG. In 2016 the Cottage gained a glass front door, a resurfaced floor and a new temporary exhibition.

We contributed to the 2018 celebrations by helping to rebuild the platform by the lily pond.

Funds are generated by membership fees.
